

**Title**

Immune Cell Studies in Type 1 Diabetes

**Acronym**

ISTID

**Principal/Lead Investigator**

Professor Colin Dayan

**Participating Sites**

University Hospital of Wales

**Study Summary**

The aim of this study is to learn more about the immune cells that damage the insulin producing cells in the pancreas leading to Type 1 diabetes. This will be done by studying white blood cells from people who have just been diagnosed with diabetes, people with long-standing diabetes and relatives of people with diabetes.

**UKCTG Number**

12849

**Study Sponsor**
