

Title

Phenotyping the Brecon Cohort of childhood-onset Type 1 Diabetes to identify those at risk of adverse long-term outcomes who may in future merit immunotherapeutic intervention at diagnosis: a feasibility study

Acronym

Phenotyping the Brecon Cohort

Principal/Lead Investigator

Prof John Gregory

Participating Sites

University Hospital Wales

Study Summary

This study plans to utilise the Brecon Cohort (a database of >97% of all children diagnosed with T1D in Wales) to conduct biological phenotyping of children with T1D to identify children who will benefit most from early immunotherapeutic intervention to preserve beta cell function.

UKCTG Number

37939
